*Our Mission is to teach the lessons of the Holocaust
to inspire action against bigotry, hatred, and violence.*

Lieutenant-General (ret) The Honorable Roméo A. Dallaire is the founder of the Dallaire Institute for Children, Peace, and Security, the global partnership with the mission to end and prevent the recruitment and use of children in violence.

As Force Commander of the United Nations Assistance Mission for Rwanda, General Dallaire, along with a small contingent of Ghanaian and Tunisian soldiers and military observers, disobeyed the command to withdraw and remained in Rwanda to fulfill their ethical obligation to protect those who sought refuge with the UN forces. In 2014, the United States Holocaust Memorial Museum bestowed the Elie Wiesel Award on General Dallaire in recognition of his valiant attempts to warn the world of and prevent the 1994 genocide.

The event will feature a special exhibit.
We will provide more details in future correspondence.

PLEASE NOTE, Arthrex One Conference Center requires that masks are worn by everyone in the facility unless you are actively eating or drinking. As the Museum’s guests at Arthrex One Conference Center, the Museum requires proof of full vaccination or proof of a negative COVID test taken 72 hours in advance of the event for all attendees. Instructions are enclosed for providing proof.

If you attended The Luncheon on December 2, 2021 and provided proof of vaccination, you do not need to send proof again. If you provided a negative test, however, you will still need to provide a negative COVID test taken 72 hours before March 3, 2022.

Arthrex Safety Precautions

You may be wondering what steps Arthrex One Conference Center is taking to ensure the safety of the air while we attend Triumph of Courage on March 3rd.

Arthrex, a global medical device company and leader in new product development and medical education, is using numerous and strategically placed devices called The Sphere and The Sentry made by Synexis, the first company to create and patent Dry Hydrogen Peroxide (DHP™), a unique molecule designed to fight viruses, bacteria, mold, odors, and insects.

Made from naturally occurring elements already in the air, DHP™ is designed to safely and effectively break down pathogens – flowing freely and continuously through indoor spaces to reduce the presence of microbes in the air and on surfaces, with no reliance on the exchange of air.

DHP™ was designed to safely, continuously, and effectively flow throughout indoor, occupied spaces to fight pathogens in the air and on surfaces. If you’d like to learn more, go to <https://synexis.com/science/howdhpworks/>.
